Books are better than TV

I will convince you that books are better than watching TV.

Firstly books can fill your mind with a whole lot of things, because reading helps you to say words better and helps to make your brain think.

Secondly some people think reading books is hard work but they are wrong because watching TV is being lazy.

Thirdly books can tell you more about the world and how other people live, I’m sure after reading my report you would agree with me that books are definitely better than watching TV.
